LIMEHUT
UILDING MAINTENANCE

Our Expertise:

Specialization in Healthcare Design: Limehut specializes in designing healthcare facilities, including clinics, hospitals, dental offices, and medical laboratories.

Experienced Team: Our team consists of talented interior designers, architects, and healthcare design experts with a deep understanding of healthcare regulations and best practices.

Patient-Centered Design: We prioritize the patient experience, creating environments that promote healing and comfort while maintaining a sterile and hygienic atmosphere.

WHAT SPECIFIC TYPE OF HEALTHCARE SERVICES ARE YOU INTERESTED IN PROVIDING?

VISION AND MISSION

To lead in healthcare interior design, crafting healing spaces that elevate patient care and inspire wellness, driven by creativity, empathy, and a commitment to excellence.

Why Choose Us:

- **Healthcare Specialists:** Experts in healthcare interior design.
- **Patient-Centric:** Focus on improving patient experiences.
- **Compliance:** Navigate regulations effortlessly.
- **Creative Vision:** Bring your unique vision to life.

When you choose us, you're selecting a design partner with a deep understanding of healthcare's unique requirements and a commitment to creating exceptional spaces that enhance patient care and the overall healthcare experience.

SERVICES WE OFFER

➤ At Limehut, we are dedicated to transforming healthcare spaces into nurturing environments that promote healing and well-being

Our specialized services cater to the unique needs of healthcare facilities, clinics, and medical offices.

We offer comprehensive interior design solutions, including space planning, layout design, and the selection of healthcare-specific materials and furnishings. Our expertise extends to creating patient-centric designs that prioritize comfort, infection control, and accessibility. Whether you're looking to revamp an existing healthcare facility or embark on a new construction project, we are committed to crafting innovative, patient-friendly, and aesthetically pleasing interiors that enhance the healthcare experience for patients, visitors, and staff. Partner with us to bring your healthcare space vision to life, elevating the standard of care and creating healing environments that positively impact the lives of all who enter.

HEALTHCARE INTERIOR DESIGN

Tailored designs that reflect your clinic's unique identity while ensuring functionality and compliance with healthcare standards.

CIVIL WORK

inside a healthcare involves the construction and maintenance of structural elements

MATERIAL SELECTION

WE ARE ALWAYS STAND BY FOR THE BEST SERVICE

CUSTOM FURNISHINGS

Creation of custom furniture and fixtures that meet your specific needs.

SUSTAINABLE DESIGN

Incorporation of eco-friendly and sustainable design elements to promote a healthy environment.

PROJECT MANAGEMENT

Comprehensive project management services from concept to completion.

DEPARTMENTS WE WORK ON IT

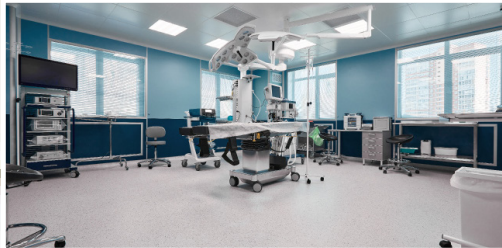

In healthcare departments, civil work plays a vital role in ensuring the structural integrity and functionality of facilities.

Our dedicated team of civil engineers and construction professionals is responsible for creating a safe and efficient environment where patient care can thrive. We oversee the design and construction of essential elements, such as foundations, walls, partitions, ceilings, and flooring. We ensure that these components not only meet regulatory and safety standards but are also designed with the specific needs of healthcare settings in mind. Whether reinforcing structural elements to support heavy medical equipment or implementing soundproofing measures to protect patient privacy, our civil work is integral to creating spaces that promote healing, safety, and efficiency within healthcare departments.

Emergency Department

Civil work in the ED focuses on creating a structurally sound environment for swift, life-saving care, including robust foundations, partitioned spaces, and flooring that withstand high traffic.

Medical/Surgical Unit

Civil work ensures the integrity of walls, ceilings, and flooring for patient comfort and safety during medical treatments, surgeries, and recovery.

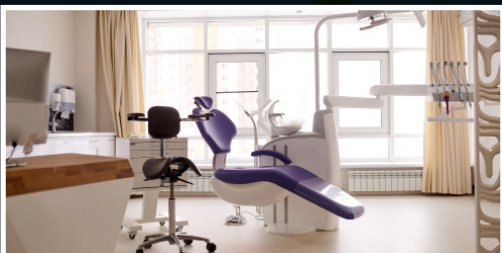

Laboratory Department

Structural integrity is crucial for housing delicate laboratory equipment and creating controlled environments for accurate diagnostics.

Radiology/Imaging Department

Civil work encompasses radiation shielding, soundproofing, and structural support to ensure safe and precise imaging procedures.

Dental Clinic

Structural integrity is essential for dental chair installations, specialized plumbing for dental equipment, and soundproofing for patient comfort.

CIVIL WORK PROCESS

Civil work inside a healthcare involves the construction and maintenance of structural elements, walls, partitions, and other architectural components to create functional and safe interior spaces. Here are more details about civil work inside a healthcare:

Foundation and Flooring

In healthcare construction, a strong foundation provides stability, while hygienic flooring ensures safety and comfort for patients and staff.

- ✓ Foundation
- ✓ Flooring
- ✓ Subflooring

Walls and Partitions

Healthcare walls and partitions are expertly designed for privacy, infection control, using features like anti-microbial materials for safety

- ✓ Interior Walls
- ✓ Soundproofing
- ✓ Radiation Shielding

Ceiling

Healthcare ceilings are purposefully designed with acoustic, lighting, and infection control features to enhance patient comfort and staff

- ✓ Ceiling Structure
- ✓ Ceiling Tiles
- ✓ Ceiling Grids

Boost Well-being With a Fresh, Inspiring Atmosphere

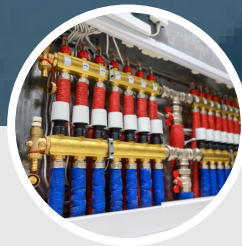

Impress With a Stylish, Inviting Space

Doors and Windows

In healthcare construction, doors prioritize patient flow and infection control, while windows offer natural light and a connection to the outdoors

- ✓ Doors
- ✓ Windows
- ✓ Lead doors and windows

Electrical and Plumbing

electrical and plumbing systems are vital for powering equipment and maintaining a sterile water supply, supporting medical operations.

- ✓ Electrical Wiring
- ✓ Plumbing
- ✓ HVAC Systems

Lighting

lighting is strategically designed to enhance patient comfort, staff efficiency, and safety,

- ✓ Light Fixtures
- ✓ Surgery light
- ✓ Emergency Lighting

IT INFRASTRUCTURE

A robust information technology (IT) infrastructure is the backbone of modern healthcare delivery. It encompasses a network of interconnected hardware, software, and communication systems that enable the secure storage, exchange, and access of patient data, ensuring efficient care coordination and improved patient outcomes.

DATA CENTERS

Secure and redundant data centers with servers and storage systems

NETWORKING

Robust network components like routers, switches, and firewalls

CLOUD SERVICES

Scalable and secure cloud infrastructure for storing, processing, and backing up

VIRTUALIZATION

Virtualization technologies to optimize server utilization, reduce hardware costs

INTERNET OF THINGS

Network infrastructure to connect and manage a wide range of IoT devices

CCTV SYSTEM

security camera system that records video for surveillance. It helps enhance safety.

“

We provide round-the-clock IT support and maintenance with expert technicians, quick response times, and a proactive approach, ensuring optimized performance and data security, all tailored to your unique needs and cost-effective.

IOT TECHNOLOGY

Transform your healthcare into a smart, connected haven with IoT technology. Control lighting, security, and temperature settings seamlessly through your smartphone or voice commands. Enhance energy efficiency, security, and convenience while enjoying a modern, inter-connected stay experience.

Smart Thermostat

A sleek smart thermostat on a wall, with a caption like “Effortlessly control the rooms temperature with a smart thermostat.”

Smart Room

you can control lighting, temperature, security, and more through your smartphone or voice commands. Enjoy convenience and energy savings by customizing your environment to fit your preferences.

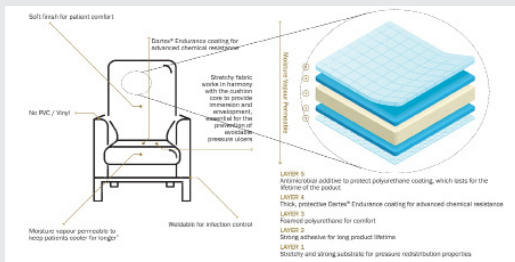

Health Monitoring Wearables

A person wearing a smartwatch or fitness tracker with a caption like “Monitor your health and wellness with wearable technology.”

MEDICAL Furniture

Medical furniture, coupled with anti-microbial upholstery, is integral to healthcare facilities, combining comfort with infection control.

These purpose-built pieces not only provide ergonomic support and functionality but also incorporate materials that inhibit the growth of harmful microorganisms. By prioritizing hygiene and patient well-being, this furniture contributes significantly to the overall quality of care and safety within healthcare settings, ensuring a sterile and comfortable environment for patients and medical staff alike.

Anti-Microbial Upholstery

Select upholstery fabrics with anti-microbial properties to minimize the risk of bacterial growth.

Durable Materials

Choose furniture made from materials like metal or high-density polyethylene (HDPE) that are easy to clean and maintain.

Ergonomic Design

Prioritize ergonomic designs for patient and staff comfort.

CABINETRY AND COUNTERTOPS

Medical laboratory cabinetry provides essential storage and organization, constructed with durable, chemical-resistant materials to ensure safety and efficiency in healthcare and research environments. Its ergonomic design and customizable features contribute to a sterile, well-organized setting, critical for accurate testing, research, and patient care.

Countertops

Medical countertops are purpose-built with stain, chemical, and moisture-resistant materials, ensuring hygiene and durability in healthcare settings, vital for patient care, diagnostics, and safe medical equipment handling.

- ✓ High-Pressure Laminate (HPL)
- ✓ Solid Surface(corian)
- ✓ Stainless Steel
- ✓ Quartz
- ✓ Phenolic Resin
- ✓ Epoxy Resin

Please don't hesitate to contact us for any medical product needs or questions. We're here to assist you.
